Changes Made/Suggested are as follows: None. Approve & Passed.

_____

Version 2.0 Review Log

Author: Sandeep Mertia

Date: 08 April, 2013

Changes Made by Nitish & Prashant are:

Based upon the final product that we have been able to deploy, we have to make the following changes in our RTM:

1. Under the first column of Product features, change the name of product feature from Category/Tag System to Category System.
2. Under the second column of Product features, change the name of product feature from Archival Search to Archival fetching.
3. Similarly, Site Map is changed to TOC in the product features.
4. Similarly, 'Recommend an article' to 'Most Popular Articles'.
5. Similarly Trending Articles to Bulletin Board Panel.
6. Add a 'Twitter Pane' column towards the end of the product features.
7. Remove the row labeled 'Tags as Authors Name'.
8. Under the requirement section, replace the row bullet 'Robust Searching' by 'Robust Searching (Edition/Category wise)'.
9. Just beneath it, add a row labeled 'Table of Contents'.
10. Down the line, rename 'User based recommendations' to 'System generated recommendation'.
11. Similarly rename 'Navigation' to 'Ease in navigation' under the requirements section.
12. In the end, add a row by the label 'Twitter Integration'.
13. Now changes are made by marking the appropriate and matching requirements which are correspondingly satisfied by the product features.

All changes approved and passed.
